CAREER OBJECTIVE

BRAC University CSE graduate and **Oracle Cloud Infrastructure 2025 Certified DevOps Professional** with eight Oracle certifications (Generative AI, Multicloud Architecture, Data Science, MySQL HeatWave). Hands-on experience in cloud computing, CI/CD, full-stack development, software testing, QA, neural networks and digital signal processing. Seeking a DevOps, Cloud, AI/ML or Software Engineering role to build scalable, intelligent solutions.

PROFESSIONAL TRAINING

SQA: Manual & Automated Testing — OSTAD Career *(2025, ongoing)*

Covering SDLC, STLC, manual testing, API testing (Postman) and automation (Playwright, Selenium, POM). Hands-on practice in defect reporting, RCA, Git and CI-ready frameworks. The global SQA market has surpassed $40B, with 75% of enterprise testing already automated — and I am building the skills to lead that shift.

PROJECTS

Any Car Solution — Full-Stack Car Rental & Servicing Platform

MERN Stack, React 19, Node.js, MongoDB, Socket.io, OpenAI API | github.com/Atef123Ahabab/any-car-solution

- Built a full-stack car rental and servicing platform with role-based dashboards for customers and owners; deployed on Render with MongoDB Atlas.
- Implemented car listings with filters/search, date-range booking modals, servicing request tracking and real-time chat via Socket.io.
- Integrated an AI assistant using the OpenAI API for recommendations and queries; added JWT authentication, Multer image uploads and a dark/light theme toggle.

Career Portal — AI-Powered Job Portal

React.js, Node.js, MongoDB, Express, Grok API, Gemini API | github.com/Atef123Ahabab/Career-portal-

- Built a full-stack AI job portal connecting job seekers and employers with smart recommendations; deployed on Vercel with MongoDB.
- Designed a resume parser using NLP to extract skills/experience from PDF/DOC files; implemented skill-based job posting and filtering.
- Created a fraud/spam detection system with audit logging, plus Grok API skill recommendations and Gemini API cover letter generation.
